

November 12, 2007

Docket No. EN9-98-141US2

Applicant: Sebesta, *et al.*

U.S. Patent Application Serial No. 09/526,957

U.S. Patent No. 6,900,545

Filed: March 16, 2000

Issued: May 31, 2005

Art Unit: 2827

Examiner: James Mitchell

Title: VARIABLE THICKNESS PADS ON A SUBSTRATE SURFACE

Certificate of Correction Branch,
United States Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

REQUEST FOR A SECOND CERTIFICATE OF CORRECTION

The first request for correction of this patent was partially denied (see pages 6 and 7)

A second request for correction was submitted February 1, 2006 (see pages 2-5). It was received by the U.S. Patent Office (see page 2, Patent and Trademark Office postmarked February 6, 2006). The Patent Office shows no record of this submission on the Private PAIR system.

This second request used the Examiner's Amendment of July 22, 2004 (page 3 of the Examiner's Amendment is attached as page 8) as the basis for making the non-approved changes. This second request is attached (pages 2-7).

September 18, 2007, a Certificate of Correction was issued but did not include the four changes in which the Examiner's Amendment changed "substrate" to "circuit line".

November 1, 2007, Mr. Whitehead, of the Certificate of Correction Branch, United States Patent Office, suggested we resubmit the request for a Certificate of Correction which was originally submitted February 1, 2006.

Additionally, we did not receive the Certificate of Correction issued September 18, 2007 (page 1).

Please issue a Certificate of Correction in which all of the changes requested are included (see page 4).

Thank you.

MEMO ABOUT THE ENCLOSED REQUEST FOR A CERTIFICATE OF CORRECTION

Patent No. 6,900,545 B1

Dated: May 31, 2005

The *Response to Rule 312 Communication* that applies to this request for a *Certificate of Correction* that was mailed to our firm January 10, 2006, is enclosed.

After communicating with Examiner Mitchell, January 25, 2006, he said we were correct in submitting the deletion of "substrate" and insertion of -- circuit line -- in four places in Columns 10 and 11 of the patent, even though the *Response to Rule 312 Communication* disapproved of the substitution.

The substitution is to be allowed because it had been introduced by the Examiner in the *Examiner's Amendment* that accompanied the *Notice of Allowance* mailed July 22, 2004.

The enclosed request for a *Certificate of Correction* includes the previously approved changes and also the changes now approved by Examiner Mitchell (January 25, 2006). This *Certificate of Correction* is to take the place of the previously submitted *Certificate of Correction*.

Thank you.

Jack Friedman, Ph.D.

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

1. The amendment filed on 07 December 2005 under 37 CFR 1.312 has been considered, and has been:

- a) entered.
- b) entered as directed to matters of form not affecting the scope of the invention.
- c) disapproved because the amendment was filed after the payment of the issue fee.
Any amendment filed after the date the issue fee is paid must be accompanied by a petition under 37 CFR 1.313(c)(1) and the required fee to withdraw the application from issue.
- d) disapproved. See explanation below.
- e) entered in part. See explanation below.

The amendments to the claims to delete the word "and" shall be entered. However, substitution of the word circuit line for substrate is disapproved, because it is not merely a formal matter, but changes the scope thereof. see MPEP 714.16

Claims

Cancel claims 7, 28-32, 35-36 and 39.

In claim 2, Lines 7, 9, 16 after "substrate," delete "and";

in Line 5 after "in a" insert - - first - -;

in Line 8 after "substrate" insert - - , wherein a width in a second direction of the second portion of the first circuit line exceeds a width in the second direction of the first portion of the first circuit line, wherein the second direction is oriented parallel to the surface of the substrate- -; and

in Line 17 after "contact" insert - - , and wherein a width in the second direction of the second portion of the second circuit line exceeds a width in the second direction of the first portion of the second circuit line;

an electronic assembly coupled to the first conductive pad; and
an electronic carrier coupled to the second conductive pad- -.

In claim 3, Line 16, after "substrate," delete "and" in line 17; and in Line 23 after "substrate," delete "and";

in Line 12 after "in" delete "a" and insert- - the- -;

in Line 13 after "to" delete "a" and inset- - the- -;

in Line 22 after "in" delete "a" and inert- - the- -;

in Line 22 after "to" delete "a" and inert- - the- -;

In Line 24 after "substrate," insert - - wherein the third circuit line physically touches the first circuit line in direct surface-to-surface contact, and wherein the third circuit line physically touches the second circuit line in direct surface-to-surface contact;

an electronic assembly coupled to the first conductive pad; and
an electronic carrier coupled to the second conductive pad- -.

In claim 9, Lines 2 and 4 after "ball" delete "coupled to " and insert - - coupling- -, and in Line 2 after "pad" insert - - to the electronic assembly; and- -;

In Line 4 after "pad" delete "and an electronic carrier coupled to the second solder ball" and insert - - to the electronic carrier- -;

In claim 12, Line 3 after "coating;" delete " an" in Line 4 and insert - - wherein the- -;
